

THIRD REPORT
OF THE
ROYAL UNIVERSITY
OF
IRELAND.

Presented to both Houses of Parliament by Command of Her Majesty.

DUBLIN:

ALEX. THOM & CO. (LIMITED), 87, 88, & 89, ABBEY-STREET,
THE QUEEN'S PRINTING OFFICE.

To be purchased, either directly or through any Bookseller from any of the following Agents, viz. :
Messrs. HANSARD, 13, Great Queen-street, W.C., and 32, Abingdon-street, Westminster;
Messrs. EYRE and SPOTTISWOODE, East Harding-street, Fleet-street, and Sale Office, House of Lords;
Messrs. ADAM and CHARLES BLACK, of Edinburgh;
Messrs. ALEXANDER THOM and Co. (Limited), or Messrs. HODGES, FIGGIS, and Co., of Dublin.

1885.

[C.—4557.] Price 1d.

THIRD REPORT

OF

THE ROYAL UNIVERSITY OF IRELAND.

TO HIS EXCELLENCY JOHN POYNTZ EARL SPENCER,
K.G., &c.

LORD LIEUTENANT-GENERAL AND GENERAL GOVERNOR OF IRELAND.

ROYAL UNIVERSITY OF IRELAND,
March 27th, 1885.

MAY IT PLEASE YOUR EXCELLENCY,

The University Education (Ireland) Act, 1879, and Her Majesty's Charter founding the Royal University, direct that the Chancellor of the University shall annually furnish a Report to the Lord Lieutenant on the condition and progress of the University.

Complying with those provisions, I have already had the honour of submitting to your Excellency two Reports upon the condition and progress of the University to the early part of the year 1884; and I now proceed to submit my third Report upon its condition during the year which has since passed.

It is a great pleasure and satisfaction to be able to state that the progress of the first two years of the existence of the University as a working institution, has been maintained, and that there is every ground for hoping that its success is assured, and that it will take rank in the future among the permanent institutions of the country.

The number of persons who passed through the various Academic Examinations of the University during the year 1884, was 2,101.

Examinations in the Faculty of Medicine were held in the month of June. Fifty-nine Candidates presented themselves for the final Examination for the degree in Medicine, or its complement, the Mastership in Surgery, or the Diploma in Obstetrics. Of these 32 were successful in passing the Examination, and were admitted to the Degrees or Diploma.

At the Preliminary Professional Examinations held at the same time, known respectively as the First and Second Examinations in Medicine, 104 Candidates presented themselves, of whom 65, or 63 per cent., passed.

The general University Examinations were held in September and October. At the various Examinations in the Faculty of Arts, 846 Candidates presented themselves, of whom 662, or 78 per cent., passed, a considerable number obtaining honours in one

or more branches of the Examination. Among the successful Candidates, 100 passed the Examination for the degree of B.A., and 6 for the degree of M.A.

The total number of Candidates who presented themselves at the Autumn Final Examinations in the Faculty of Medicine was 211, of whom 129 passed the Examination for the degree in Medicine, or for the Mastership in Surgery, or the Diploma in Obstetrics. Of these 6 passed the Special Honour Examination. Of 99 who presented themselves at the Second Examination in Medicine, 44 passed, 4 with Honours; and of 93 who presented themselves at the First Examination in Medicine, 73 passed, 7 with Honours.

The Examination for the Diploma in Sanitary Science was held, for the first time, last Autumn, and one Candidate was adjudged to have passed the Examination.

In the School of Engineering 20 Candidates presented themselves for Examination, 5 passed for the degree of B.E., 4 with Honours; 6 passed the Second Examination in Engineering, 3 with Honours; 5 passed the First Examination in Engineering, 3 with Honours.

In the Faculty of Law 4 Candidates presented themselves at the Examination for the degree of LL.D., 3 of whom obtained the degree. Seven presented themselves at the Examination for the degree of LL.B., of whom 5 passed, 2 receiving prizes.

In October, 1884, the Fourth Matriculation Examination was held at suitable centres in Dublin, Belfast, Carlow, Cork, Galway, Limerick, Londonderry, and Tullamore.

The number of Candidates who presented themselves was 657, of whom 79 were women.

The number who passed was 525, including 66 women.

The Senate awarded 10 First Class Exhibitions, and 20 Second Class.

A supplemental Matriculation Examination was held last January, for a few Candidates, who, having entered their names for the October Examination, were prevented by illness or other good cause from attending.

The Fourth Examination for Scholarships was also held last January. Seven Candidates presented themselves as Competitors for the two Classical Scholarships; twelve, including one woman, for the two Mathematical; and twelve, of whom four were women, for the two in Modern Literature. The answering was so good that, on the Report of the Examiners, the Senate awarded the six Scholarships.

A table appended to this Report will give a summary of the chief numerical details connected with the various Examinations and their results.

Last year I had the honour of specially bringing to the notice of Your Excellency, the honourable position which the women Students of the University had secured for themselves, the excellent Academical work which they had done, and the distinctions which they had secured. It is gratifying to be able again to speak on these points in terms of complete satisfaction.

The number of women Students who may venture to avail themselves of the opportunities presented to them by this University cannot be large, because the condition of the great majority of the girls' schools throughout the country is not generally such as would admit of the training of their pupils for the more strict and difficult studies that form the staple of University education. But the comparatively small number of the women Students who have been able to present themselves at our Examinations during the past year have been so successful, that it is plain that greater facilities, and an improved character of education, would be attended with satisfactory academical results for women Students. What has been already accomplished by them in this University, notwithstanding the disadvantages alluded to, fully justify the anticipations which suggested the provisions of the Act of 1879 and of Her Majesty's Charter, by which the Examinations, Honours, and Prizes of the University were made open to women as well as to men.

Last year I reported that the nine women Students who presented themselves at the Second University Examination in 1883, had all passed the Examination, five of them obtaining Honours. I am now able to continue this satisfactory record, by stating that the same nine Candidates satisfactorily passed last autumn the Examination for the Degree of Bachelor of Arts, four of them obtaining Honours in the department of Modern Literature, and one in that of Logic, Metaphysics, and Political Economy. One of them, Charlotte M. Taylor, further obtained the distinction of becoming the first Bachelor of Music of this University, being, I believe, the first woman who has obtained that degree in the United Kingdom.

Last Autumn, 66 women Students passed the Matriculation Examination, of whom 20, or nearly one-third, obtained Honours.

Nineteen passed the First University Examination in Arts, of whom eleven obtained Honours. Seventeen presented themselves at the Second University Examination in Arts, all of whom passed, and eleven obtained Honours, some in three subjects, and one, Annie W. Haslett, heading the Honour list in both English and German.

And at the Examination for the University Scholarships, held last January, the women Candidates were remarkably successful. The total number of Candidates for the six Scholarships offered for competition was thirty-one, five being women, and twenty-six men. But the women Candidates succeeded in carrying off half the total number of the Scholarships, winning one of the Mathematical ones, and both those offered in Modern Literature.

Passing now to other matters, I have to record with deep regret, the death, on the 1st of February of this year, of Lord O'Hagan, K.P., the Vice-Chancellor of the University, to whose judgment, tact, and exertions, our University is greatly indebted for its organization and success.

Our sense of the loss we have thus sustained was enhanced by the death, only a few days later, namely on the 11th February, of another distinguished Member of the Senate, Cardinal MacCabe,

who enjoyed in a high degree the esteem and regard of his fellow Senators.

There are thus now two vacancies in the Senate. The election of a Member to fill one of them will, under the Charter of the University, fall to Convocation; and the appointment to the second vacancy will rest with Her Majesty.

A vacancy occurred in the Senate last summer by the resignation of the Very Rev. William J. Walsh, D.D., President of St. Patrick's College, Maynooth. As Dr. Walsh had not been one of the Senators named in the original Charter, but had been subsequently appointed by Her Majesty to fill a vacancy which had arisen, the appointment to the vacancy caused by his resignation vested in the Crown; and Her Majesty was pleased by Royal Warrant, dated 10th July, 1884, to appoint the Rev. John Healy, D.D., one of the Professors at St. Patrick's College, Maynooth, to be Dr. Walsh's successor in the Senate. Dr. Healy has since been appointed and consecrated one of the Roman Catholic Bishops of Ireland.

At a meeting of the Senate held on the 29th day of May, the Senate elected two Fellows in the Department of Modern Literature, and also two in the Department of Natural History.

Additional Examiners were also appointed to assist in carrying out the various examinations prescribed by the University in the Faculties of Arts, Music, Medicine, and Law, and in the School of Engineering.

Last autumn the Senate obtained from Her Majesty a supplemental statute, under which some changes of detail have been made in the courses and regulations for the various examinations of the University. But this has been done without any sensible alteration in the lines originally laid down in the scheme presented to your Excellency's predecessor, Earl Cowper, K.G., and submitted to Parliament in April, 1881.

I have much pleasure in reporting to your Excellency that, under a scheme settled last year by the Court of Chancery with reference to the residuary estate of the late Dr. Henry Hutchinson Stewart, a special fund has been placed at the disposal of this University to be employed for scholarships, the general character and objects of which are defined by the scheme. The average annual amount of this fund will for the present be nearly £300. This has allowed the Senate to establish three scholarships, each tenable for three years:—One of the annual value of £50 for proficiency in the knowledge of mental diseases and kindred subjects; one of the annual value of £10 for proficiency in the subjects at present prescribed for the Second Examination of the University in the Faculty of Medicine; and the third, of the annual value of £30, will be assigned to the candidate who will be found to have obtained the highest aggregate of marks at the Honour Examinations in English and in a Modern Language at the First University Examination in Arts, and at the Second University Examination in Arts in the year immediately succeeding.

The Drapers Company of the Corporation of London, who hold property in the city and county of Londonderry, have also been

good enough to intimate their intention of establishing a scholarship, tenable for three years, of the annual average value of £35, to be assigned to the woman student obtaining the best place on the Honour lists at the Matriculation Examination of our University. The obtaining and holding of this scholarship is to be made dependent on the fulfilling of certain conditions which will be shortly announced by the Company.

I trust that this excellent example set by the Drapers Company will be extensively followed. Encouragement and assistance will in this way be secured for deserving young persons possessing considerable abilities, but who are hindered by straitened means from availing themselves of the opportunities of higher education. As I have already remarked, this encouragement and assistance is especially required in connexion with the education of girls in Ireland, which has been left practically destitute of the funds and other helps which are to some extent forthcoming in the case of boys.

I may take this opportunity of bringing to the notice of Your Excellency that our Senate and graduates, considering that they had a good claim to receive the privilege of Parliamentary representation, have addressed petitions to Parliament, praying that in the Redistribution of Seats which is at present occupying the attention of the Legislature, this claim shall not be overlooked. The number of graduates of our University is over 2,700. Considering the success which has already attended our work we have good reason to expect that our rate of annual increase will be considerable, although we trust that we shall be able to raise gradually our standard, which is already admitted to be very high. Under these circumstances it is not easy to see how the privilege of Parliamentary representation can be denied to our University, while it is extended to others.

The principal public meeting of the University to confer Degrees and declare the distinctions obtained by candidates at the Honour Examinations, was held on October 22nd, 1884. The occasion was one of special interest, as being the first time when Degrees in Arts and Music were conferred on women students in Ireland. Great regret was felt that absence on public duty prevented Your Excellency from honouring us with your presence, as you had done at our first public meeting in November, 1882. A large number of influential and representative persons attended, and followed with evident interest the proceedings, an account of which is appended to this Report.

In conformity with the provisions of the Act of Parliament, 44 and 45 Vic., chap. 52, the accounts of the receipts and expenditure of the University, with the corresponding vouchers and other documents, are rendered quarterly to the Controller and Auditor-General, who submits an annual report and abstract to Parliament.

I have the honour to be

Your Excellency's faithful and obedient servant,

ABERCORN,

Chancellor.

APPENDIX.

APPENDIX I.

THIRD PUBLIC MEETING OF THE ROYAL UNIVERSITY OF IRELAND.

OCTOBER 22ND, 1884.

Upon the conclusion of the Autumn Examinations, 1884, the Third Public Meeting of the Royal University of Ireland was held in the Large Examination Hall of the University, on October 22nd, 1884, for conferring Degrees and Diplomas, and declaring the successful candidates for Honours and Exhibitions.

Several Peers and official and other personages, many clergymen, and members of the learned professions, and a large number of the citizens of Dublin and visitors from other parts of Ireland, were present, completely filling the large Hall.

The Senate, headed by the Chancellor, the Fellows, and other Examiners of the University, and the Candidates, entered the Hall in procession.

His Grace the Duke of Abercorn, K.G., Chancellor of the University, having taken his seat, a Musical Exercise, composed by Miss Charlotte Taylor, as a portion of her examination for the degree of Bachelor of Music, was performed under the direction of Sir Robert Stewart, one of the University Examiners in Music, Miss Taylor herself playing the accompaniment on the organ. The Exercise consisted of a Cantata, which was a setting of some verses from the 57th Psalm, for solo voices and chorus in four parts.

His Grace the Chancellor then said :—

My lords, ladies, and gentlemen, it affords me the most sincere gratification to again preside at the conferring of the Degrees of the Royal University of Ireland.

On the last occasion when I had the pleasure to address the members of this University, I was able to speak in hopeful terms of our prospects in the future, and to anticipate that the expectations which had been formed of the national results of our University were likely to be realized. What was then an aspiration for the future has now become a fact of the past ; and I am able now, not only to express such hopes of our future, but to show from substantial data that we may fairly look for the accomplishment, at no distant period, of the fullest expectations of those to whom we are indebted for the existence of our University.

The number of students seeking to prepare themselves for the great battle of life into which they are about to enter has, within the very short time that has elapsed since our University was founded, considerably exceeded the estimates which had been previously formed as to the numbers likely to avail themselves of University education, and what is more satisfactory even than mere numbers, is the fact that, in the various branches of learning with which our annual Examinations are concerned, there seems to have been, on the part of the great majority of the candidates who have this year presented themselves an

amount of careful study and preparation which cannot fail to leave a life-long impression upon their minds.

The ceremony in which we are called upon to take part this day, is possessed of a very special interest upon two grounds, either of which would, I conceive, have been in itself sufficient to mark it as a day of no small importance in the educational history of our country.

I do not propose to enter here into matters of controversy relative to higher education in Ireland, but will simply confine my observations to the statement of facts which now exist. This year, for the first time, the candidates who commenced their University career under the auspices of the Royal University, are eligible for our Degrees, and it must afford all true lovers of our common country no small pleasure to find that amongst those upon whom degrees are this day to be conferred, there are not merely students from those colleges whose pupils have for many years presented themselves for University Degrees, but that we have also before us this day a very substantial number of students prepared in the various Catholic Colleges of Ireland. May I not then hail the events of this day as a bright spot in the history of our country, and ask you all to join with me in a fervent hope that all those who have in fair and honourable rivalry been competing within our walls during their undergraduate career may now, upon the completion of their course, carry with them into their various pursuits in life that knowledge of their competitors as fair and honourable gentlemen, which will induce in their minds that spirit of toleration and good feeling from which there springs so much to be admired, and so much to be desired.

But the fact that the large class of students to whom I have been referring, now for the first time present themselves for our degrees, is not the only ground upon which the proceedings of this day may claim a place of pre-eminence in the annals of our country. To-day also for the first time in the history of Irish education members of the fair sex come before us as candidates for our degrees, thus realizing the poetic aspiration of Tennyson, of

“Sweet girl graduates, in their golden hair,”

and I need not say that we shall hail with no less pleasure those that come to us not with the golden hair of the Saxon, but with the darker and more luxuriant tresses that adorn the fair of Milesian race.

It will, in a few minutes more, become my duty as the Chancellor of this University to confer the degree of Bachelor of Arts upon the mystic and classic number of nine ladies, for all of whom I may say that they have fairly and earnestly striven in the intellectual competitions which the course of studies in our University enjoins, while our lists of candidates to whom Honours and Exhibitions have from time to time been awarded, contain the names of many of them, and even in the severe struggle which a degree with honours entails upon those who seek for it, several of the nine appear among the victors. While speaking of the success which has been attained by the young ladies to whom I have been alluding, I may add that the number of female candidates presenting themselves for our Examinations has exhibited a very rapid increase, so much so that while only a little over twenty female candidates appeared at our Matriculation Examination in 1881, the number at our Examination for Matriculation which has just concluded was very nearly eighty; and with reference to the answering of the large majority of the female candidates who attended at our different Examinations this autumn, I must state that it was on the whole of a very high quality, and at both the Second University Examination in Arts and the Degree

Examination, each candidate who presented herself was so thoroughly prepared as to satisfy the Examiners, a result which was by no means attained by their competitors of the sterner, I may probably add in some cases, of the less industrious sex.

The degree in Music, too, is to be this day, for the first time I believe, in the United Kingdom, conferred upon a young lady who will also receive her degree in Arts with Honours.

Last year I stated from this place that a scholarship had been carried off by one female candidate; this year I have to chronicle not merely a repetition of such a success, but to couple with the statement the further important fact that at the last Scholarship Examination, Emma Mary Story won, not merely a Scholarship, but that she carried off the first place in the competition in Modern Literature.

I will not dwell at greater length upon the successes which have been attained within our own walls by individual students, but I must not omit to refer to the fact that as in former years, so in the one which is now drawing to a close, the Graduates of our University have been amongst the foremost competitors at the severe examinations by which in these days, those who seek to enter the service of the country are tested. I will mention as instances of these successes the case of Dr. H. Aylmer Haines who obtained a good place at the examination for the Army Medical Service, and of Dr. F. C. Ward, who was equally successful for the Naval Medical Service.

Before I proceed to state the result of the Autumn Examinations, I must refer to one matter which caused much pain and sorrow to myself and to all my colleagues on the Senate of this University. Since our last meeting here the Almighty has been pleased to remove from this world the Rev. Dr. Robinson Scott, who had been one of our body since the foundation of our University, and who, by his earnest and anxious desire to promote the real interests of education in the country, and his kindly and genial manner, had endeared himself to all with whom he was brought into contact. The Very Rev. William J. Walsh, who at our last annual meeting we welcomed amongst us as one of our body, has resigned the seat which he filled but for too short a time. The two vacancies upon our Senate thus created have been filled by the appointment of the Rev. Dr. Witherow, of Magee College, Londonderry, and the Most Rev. Dr. Healy, who at the time of his appointment was a Professor at Maynooth, but who has since been called to a place amongst the Roman Catholic Bishops of Ireland, where his talent and ability are certain to be justly appreciated. I am confident that both gentlemen bring with them to our deliberations that anxiety for the educational interests of our country which they will find to animate all the members of our body, and I have no doubt but they will be received in that circle to which I have now the pleasure of publicly welcoming them with all the enthusiasm to which their private worth and public positions so well entitle them.

As it will be my duty to refer at length to the results of the various Examinations which we have held throughout the past year when reporting to His Excellency the Lord Lieutenant, whose unavoidable absence on the present important and interesting occasion we all greatly lament, and which I have reason to know is much regretted by His Excellency who takes the liveliest interest in our University and in all the educational progress of Ireland, I will now allude only to the Autumn Examinations which have just concluded. Last year I mentioned that the total number of candidates for our Examinations that autumn had reached the large number of 2,020, but even that figure has been

exceeded this year, when I find that the numbers amount to 2,129. Last year I stated that our candidates for examination in the Faculty of Medicine were almost identical in number with those who had presented themselves in that Faculty in the preceding year, and now I have again to repeat that announcement, the total number this year being 475 as against 502 last year. The great increase in our students, however, is to be found mainly in the Faculty of Arts, where the present year presents 883 names as compared with 688 last year, or with 350 which was the number in 1882. In Engineering this year we have had 21 candidates; in Law, 11; and in Music, 1.

The number of candidates who have entered for our Matriculation Examination this year has been only 738, which while somewhat lower than the number entered last year, is still largely in excess of the estimate made at the time that the foundation and endowment of the University was under consideration.

The reduction in this year's numbers may to some extent be accounted for by the fact that we have found it necessary to meet the requirements of the country by arranging to hold two Examinations for Matriculation next year, and there is reason to suppose that several who in the ordinary course would have presented themselves this year will now wait for the earlier Examination of 1885. The results of these various Examinations have proved highly satisfactory, as we find that the percentage of well prepared candidates both in Medicine and Arts is this year considerably in excess of what it was last year. There have been adjudged to have passed their Examinations in the Faculty of Arts, 661; in the Faculty of Medicine, 251; in the Faculty of Law, 8; in Music, 1; and in the School of Engineering, 16. The Matriculation Examination was held this year while many of the University Fellows and Examiners were still engaged with their work in connexion with the other Examinations, and it may therefore be a few days longer before we are in a position to announce the results of that Examination.

It now but remains that the names of those to whom the Honours, Exhibitions, and Prizes of our University, in connexion with our late Examinations have been awarded, should be announced. The list containing as it does the names of all those who have in any branch of our University Course highly distinguished themselves, will, I have no doubt, be extremely interesting to the large assembly I have the pleasure of addressing, and will, I hope, have the effect of stimulating the efforts of others, so that they may in future years themselves occupy the proud distinction which those whose names Dr. Meredith, one of our Secretaries, is about to read out to you, now enjoy, and which they have so fairly and honourably attained.

Dr. J. Creed Meredith, one of the Secretaries of the University, then read the list of successful candidates for degrees, &c. As the names of the candidates for degrees were called, they were presented to the Chancellor by the Secretary, and were admitted by His Grace to their respective degrees:—

LL.D. DEGREE.

Douglas, Thomas.
Keightley, Samuel R.

Watts, William N.

LL.B. DEGREE.

Black, William G.
