# GENERAL REPORT.

To the Secretary of the Board of Trade.

SIR,

The Returns relating to the capital, traffic, receipts, and expenditure of the railway companies of the United Kingdom for 1904 made to the Board of Trade under the Regulation of Railways Act, 1871, and the Railway and Canal Traffic Act, 1888, being now complete, I am enabled to present to you the usual annual Report.

Up to and inclusive of the year 1901 the Report was published separately, but it has since been published as an introduction to the Statistical Returns.

In accordance with the course pursued in previous years, a Preliminary Statement of the more important particulars of railway capital, traffic, receipts and working expenditure for the year 1904, with comparative figures for 1903 and 1902, was issued early in May. The figures given were of necessity provisional only, but, as in the case of the previous statements, they approximate fairly closely to the definite figures subsequently compiled.

In the present issue of these Returns the division partially made last year between "Subscriptions to Joint Committees" and "Subscriptions to other Railway Companies" has been completed. (See Part I., pp. 2 to 45.)

Particulars, in continuation of those published for the first time in the Report for 1903, have been obtained with regard to track mileage and length of sidings. Further reference to this portion of the Return will be found on page xx.

As foreshadowed in the Report for 1903, additional Returns have been obtained from Railway Companies whose lines are worked wholly or in part by electricity, but the form in which these Returns were collected being a tentative one it is not proposed to publish the information thus acquired. It is hoped, however, that valuable Returns relating to Railways worked, or partially worked, by electric traction will be available for publication in the Reports relating to future years,

The various Summary Tables, which were rearranged in 1903, have been continued in the present volume in their revised form, and the following observations thereon are now submitted in accordance with the usual practice.

23c.

### Capital.

As regards the figures relating to capital, the following statement shows the amounts returned as paid-up at the end of each of the years 1903 and 1904, distinguishing between "Ordinary," "Guaranteed and Preference," and "Loans and Debenture Stock," and showing separately the amounts by which each description has been swollen by merely nominal additions:—

Class of Stock.	Total	l Paid up Cap	pital.	Amount included in Paid up Capital representing nominal additions on the consolidation, conversion, and division of Stocks.			
Class of Tools	1903.	1904.	Increase in 1904 over 1903.	1903.	1904.	Increase in 1904 over 1903,	
	Million £.	Million £.	Million £.	Million £.	Million £.	Million £.	
Ordinary Stock	472.5	480.3	7.8	87.0	88.2	1.2	
Guaranteed and Preference Stock	437.6	446.8	9.2	60.5	61.0	0.5	
Loans and Debenture Stock -	334.9	341.4	6.5	43.7	44.3	0.6	
Total	1,245.0	1,268-5	23.5	191.2	193.5	2.3	

It appears from this statement that the total amount of Railway capital returned as raised at the close of 1904 was  $1,268\frac{1}{2}$  million pounds, of which over 193 millions, or over 15 per cent., was due to nominal additions of the nature stated in the Table. The nominal additions formed approximately  $18\frac{1}{2}$  per cent. of the "ordinary stock,"  $13\frac{1}{2}$  per cent. of the "guaranteed and preference" stocks, and 13 per cent. of the "loans and debenture" stock.

The total amounts of capital at the end of 1904, compared with the corresponding amounts at the end of 1903, showed an increase of about  $7\frac{3}{4}$  millions in the ordinary,  $9\frac{1}{4}$  millions in the guaranteed and preference, and  $6\frac{1}{2}$  millions in the loans and debenture stock, making a total increase of  $23\frac{1}{2}$  millions. The proportions which these various classes of stock bore to the total paid-up capital differed, however, but slightly from those that had obtained at the end of the previous year, the "ordinary" stock forming 38 per cent., the "guaranteed and preference" 35 per cent., and "loans and debenture" stock 27 per cent. of the total.

It may, perhaps, be of interest to refer at this point, as has been done in previous years, to the Table now appearing as Summary Table No. 9, which shows the average rates of dividend or interest paid on each description of capital during the last ten years. The figures given in this Table have been computed from the rates returned by the Companies as having been paid, and the amounts of capital to which each rate applied. As stated in former Reports, the amounts arrived at in this way are somewhat in excess of the real amounts, mainly owing to some Companies having invested a portion of their capital in the stocks and shares of other Companies (capital to the extent of about nincteen millions being duplicated in this way), and partly also to dividends having been paid in some instances for a portion of a year only. The extent of this excess is, however, but small, as will be seen by comparing the computed average rate of interest with the proportion borne by the actual net earnings to the total capital. 1904 the former figure was 3.42 per cent., and the latter 3.36 per cent. The difference between these two figures was therefore about 0.06 per cent. On the whole paid-up capital of  $1,268\frac{1}{2}$  millions this represents a difference of £713,000. average dividends paid on the various classes of capital in 1904 were practically the

same as in 1903, with the exception of the rate of interest on loans, and were approximately 3½ per cent. on the ordinary capital, 3½ per cent. on the preference. 4 per cent. on the guaranteed, and 3½ per cent. on the debenture stock. The rate of interest on loans, which reached the high figure of 4:46 in 1903, fell to 4:11 in 1904, the latter rate being much the same as the rate prevailing in years prior to 1903.

As pointed out in a note to Table No. 9, however, these rates are naturally lower than they would have been had there been no "nominal additions" to the capital of the Companies. The average rate of dividend or interest computed on the total capital as it would have stood if no nominal additions had been made, was 4.03 per cent, as compared with the rate of 3.42 per cent, mentioned above. In like manner, the proportion of actual net earnings to capital, exclusive of the amount of nominal additions, is 3.97 per cent.

## Traffic and Receipts therefrom.

The gross receipts of the Companies in 1904 and 1903 from passenger and goods traffic were as follows:—

Page	ipt-	£		4 1		1904.	1903.	Ine	nea-e
ner	-1111-	11/011	1			1:074.	1503.	Amount.	I'er Cent.
Donato and Sa		-		-	1	Million	Million £. 48.0	Million £.	6:9
Passenger traffic			-	-	-	48-4	1,191,291,20	0.4	300
Goods traffic	-	(40)	-	-		55.4	55.1	0:3	0.5
			Total		- 1	103.8	103-1	0.7	6.7

The above statement does not include receipts from miscellaneous sources, such as steamboats, canals, docks, rents, tolls, hotels, etc.

Both passenger and goods traffic receipts in 1904 were greater than in 1903. The increases, however, are but small, and although not far short of those of 1903, they are less than half the average increases of the years 1898 to 1902.

#### Passenger Traffic.

The following statement shows the receipts from each class of passenger traffic in the last two years:—

Receipts f	rom	_			1904.	1903.	Increase (+) or	De rease ( - )
					ļ		Amount.	Per Cent.
Ordinary passengers :-	_				£.	£.	£.	
First class -	*		-	+	3,429,000	3,528,000	(-) 99,000	(-) 2.8
Second class -			-	-	3,265,000	3,332,000	(-) 67,000	1-1 2.0
Third class -			-	-	29,382,000	29,273,000	(+) 109,000	(+) 0.4
Season-ticket holders		-	-	-	3,990,000	3,852,000	(+) 138,000	(+) 3.6
Excess luggage, mails,	pai	reels, ca	rrias	ges,			1	
horses, dogs, &c.	•	*	-	-	8,322,000	7,984,000	(+) 338,000	(-) 4.2
		Total			48,388,000	47,969,000	(+) 419,000	(-) 0.9

It will be seen that a slight decrease in the receipts from ordinary passengers was more than balanced by an increase in the receipts from season-ticket holders.

amounting to £138,000, whilst the receipts from excess luggage, mails, etc., which increased by £214,000 in 1903, show a further increase of £338,000 in 1904.

The following is a comparison of the numbers of ordinary passengers of each class (exclusive of season-ticket holders) carried by the Companies during each of the last two years:—

						1904.	1903.	Increase (+) or Decrease. (-)		
		_				1002	1000	Number.	Per Cent.	
Ordinary passen	gers :	_				No.	No.		, , , , ,	
First class	•	•		-	-	34,931,000	35,069,000	(-) 138,000	(-) 0.4	
Second class	2			-		71,294,000	73,991,000	(-) 2,697,000	(-) 3.6	
Third class	*	-		*	*	1,092,549,000	1,086,205,000	(+) 6,344,000	(+) 0.6	
			Total		-	1,198,774,000	1,195,265,000	(+) 3,509,000	(+) 0.3	

It will be seen from the above statement that the *number* of first class passengers decreased in 1904 by 0.4 per cent. and that of second class passengers by 3.6 per cent. The *receipts* from these classes fell off, as previously shown, by 2.8 per cent. and 2.0 per cent. respectively. The decrease in receipts was thus greater than the decrease in number as regards first class passengers, but as regards second class passengers the decrease was greater in number than in receipts. The number of third class passengers increased by 0.6 per cent. and the receipts therefrom by 0.4 per cent.

The following statement of the average receipts per passenger, in each class, shows that the average for the first class which fell from 24·4d. in 1902 to 24·1d. in 1903, dropped in 1904 to 23·6d. The average for the second class on the other hand rose from 10·8d. in 1903 to 11·0d. in 1904. The average for the third class remained at 6·5d. whilst that for all classes fell from 7·3d. to 7.2d.

AVERAGE RECEIPTS per PASSENGER (excluding Season-Ticket Holders).

Class of Pa	isseng	ger.	1897.	1898.	1899.	1900.	1901.	1902.	1903.	1904.
First class -		_	d. 23·7	d. 23·3	d. 23.6	d. 24·0	d. 24·4	d. 24·4	d. 24·1	d. 23·6
Second class - Chird class -		-	8·8 6·5	9·4 6·5	9·8 6·5	10·4 6·5	10·8 6·5	10·9 6·5	10·8 6·5	11·0 6·5
All el	asses	-	7.2	7.2	7:3	7.3	7:3	7:3	7:3	7.2

The average receipts from each second class passenger increased during the above series of years, from about 9d. to 11d. whilst the receipts from other classes of passengers remained practically stationary.

The increase in the number of third class passengers was rather greater in 1904 than in 1903, but it was still small as compared with the annual increases shown by

the Returns for years previous to 1902. That this falling off in the rate of increase is due, in a great measure, to the increasing competition of transways, may be deduced from the following comparative statement:—

Year.	Third Class Railway Passengers.	Incres	i-e.	Tramway Pa-sengers.* (Years ended	. Increas	ee.
rear.	(Years ended 31st December.)	Number.	Per Cent.	Sorh June.)	Number.	Per Cent.
1896	888,604,000	_	_	759,466,000		
1897	935,160,000	46,556,000	5.2	788,570,000	29,104,000	3.5
1898	963,674,000	28,514,000	3.0	858,486,000	69,916,000	5.9
1899	1,003,996,000	40,322,000	4.2	924,820,000	66,334,000	7.7
1900	1,038,873,000	34,877,000	3.5	1,665,374,060	140,554,000	15.2
1901	1,068,919,000	30,046,000	2.9	1,198,227,000	132.53,000	12.5
1902	1,080,625,000	-11,706,000	1.1	1,394,453,000	196,226,669	16.4
1903	1,086,205,600	5,5%0,000	. 0.5	1,681,949,000†	287,4495,000	20.6
1904	1,092,549,000	6,344,000	0.6	1,799,343,000;	(Conn at he style	en secuente

It will be seen that the number of tramway passengers carried in 1900 was greater than the number of third class railway passengers carried in that year, and that the increases in subsequent years have been proportionately much greater in the case of the tramway passengers than in the case of the railway passengers. The date to which the Returns relating to Tramways and Light Railways (Street and Road) were made up has recently been altered, as stated in the footnote ‡ appended hereto, and consequently the increase in the number of passengers during the year ending June 30th, 1904, cannot be ascertained.

It must be borne in mind that the increase in tramway passengers in the year ending 30th June, 1903, is somewhat abnormal owing to the inclusion, for the first time, in the Returns for that year, of particulars relating to public road lines authorised under the Light Railways Act, 1896.

The following Table shows the receipts from season ticket holders for each class:-

Receipts	fron	·			1904.	1903.	Increase (+) or decrease. (-			
•	1000 (100 100 100 100 100 100 100 100 10						Amount.	Per Cent		
eason-ticket Holders				-	£.	£.	£.			
First class -		le le		23	1,437,000	1,418,000	(+) 19,000	(+) 1.3		
Second class -	*	3		8	1,038,000	1,092,000	(-)54,000	(-) 4.9		
Third class -	٠	5	+	*	1,513,000	1,342,000	(+) 171,000	(+)12.7		
		Total		- 1	§3,990,000	3,852,000	(+) 138,000	(+) 3.6		

This statement shows a further considerable increase, following on those of previous years, in the receipts from third class season tickets, the increases in this class of receipts having been in 1902, 79,000%; in 1903, 126,000%; and in 1904, 171,000%.

<sup>\*</sup> The figures with regard to the number of Tramway Passengers in each year from 1889-1903 will be found on page 237 of the "Statistical Abstract for the United Kingdom" [Cd. 2,192 of 1904]. The figure for the year 1963-4, as supplied to the Board of Trade by the Tramway Companies, and by Local Authorities, will be found in the "Tramways Street and Road) Return," House of Commons Paper, No. 310, Sess. 1904.

<sup>†</sup> Particulars relating to public road lines authorised under the Light Railways Act, 1896, included for the first time.

<sup>‡</sup> These figures represent the number of passengers carried by Street and Road Tramway and Light Railway Companies during the year ending 31st December, 1903, and by Street and Road Tramways and Light Railways owned by Local Authorities during the year ending March 31st, 1904. The period to which the figures relate consequently overlaps to a considerable extent the one to which the 1903 figures relate.

<sup>§</sup> Including £2,000 not classified.

That this increase has been to some extent at the expense of the second class may be inferred from the fact that the receipts from second class season tickets show a decrease of £54,000 in 1904, following a decrease of £8,000 in 1903. With regard to the first class the increase in 1904 amounted to £19,000 only, as compared with increases of £21,000 in 1903, and £33,000 in 1902. The total increase in season-ticket receipts was about the same as in 1903.

The numbers of season-ticket holders are now returned by the Companies on an uniform basis showing the equivalent in annual tickets. A comparison of the number of each class in the years 1903 and 1904 is given in the Table below:—

Number of—	1904.	1903.	Increase (+) or Decrease(-).		
Number of—	1304.	1300.	Amount.	Per Cent	
Season ticket Holders :  First class  Second class  Third class	169,272	128,533 186,967 302,505	(+) 2,256 (-) 17,695 (+) 41,307	(+) 1·8 (-) 9·5 (+) 13·7	
Total		618,005	(+) 25,868	(+)4.2	

The equivalent number of annual tickets thus increased at a somewhat greater rate than the receipts therefrom in the case of first and third class season-tickets, and in the case of second class season-tickets the decrease in number was much greater than the decrease in receipts. The average expenditure per annual season ticket was in fact less in the first and third class and greater in the second class than in the previous year. The average expenditure for season tickets of each class was as follows:—

Class of Ti	cket			190	)4.	190	3.	
			-	£	s.	£	s,	
First class	•	•	-	.11	0	11	1	
Second class	-	-	-	6	3	5	17	
Third class	-	-	-	4	8	4	9	
All classes	s	_	-	6	4	6	5	

Taking the receipts from season-ticket holders in combination with those from the ordinary passengers under each class we obtain the following results:—

					1903.	Increase (+) or	Decrease (-).		
Receipt from	1			1904.	Amount.	Per Cent.			
Ordinary and season-ticket passengers:—				£.	£.	£.	£.		
First class -	-		_	4,866,000	4,946,000	(-) 80,000	(-) 1.3		
Second class -		-	-	4,303,000	4,424,000	(-) 121,000	(-) 2.7		
Third class -	-	•	-	30,895,000	30,615,000	(+) 280,000	(+)0.9		
Total		-		*40,066,000	39,985,000	(+) 81,000	(+) 0.2		

<sup>·</sup> Including £2,000 not classified.

It will be seen that the effect of combining the receipts from season-tickets with the other receipts from passenger traffic is to lessen the rate of decrease of the first class receipts; to raise slightly the rate of decrease of the second class receipts; and to add somewhat to the rate of increase of the third class receipts.

# Goods Traffic.

The following statement shows the receipts from each branch of goods traffic in 1904 and 1903:—

Receipts from—	1904.	1903.	Increase (+) or Decrease (-).		
Receipts from—	1904.	1909.	Amount.	Per Cent.	
Minerals	£. 25,672,000	£. 25,351,000	£. (+) 321,000	(+).1.3	
General Merchandise	28,315,000	28,280,000	(+) 35,000	(+) 0.1	
Live stock	1,413,000	1,479,000	(—) 66,000	(-) 4.5	
Total	55,400,000	/55,110,000	(+) 290,000	(+):0:5	

It will be seen that the small increase of 0.5 per cent. on the total of 1904 as compared with that of 1903 is mainly attributable to the mineral branch of the traffic, the receipts from which increased by 1.3 per cent., while those from general merchandise increased by 0.1 per cent. only, and those from live stock decreased by 4.5 per cent.

The following Table shows the tonnage of minerals and general merchandise conveyed during each of the last two years:—

	1904.	1903.	Incr	ease.
	1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1	to the second	Amount.	Per Cent.
	Million Tons.	Million Tons.	Million Tons.	
"Minerals" conveyed	349.6	343.7	. 5.9	107(2:00)
"General merchandise" conveyed -	100.3	100.0	0:3	0.3
Total - ,-	449-9	1 443 7	6.2	1:4

It will be seen that the proportionate increase in weight is slightly greater than that in receipts, under both heads.

The volume of the production and of the export of coal have an important bearing on the railway receipts from mineral traffic, and the principal figures relating thereto are therefore given here, as in previous Reports. It will be observed that the

production of coal has increased fairly in correspondence with the increase in the railway receipts from mineral traffic.

	1001	1903.	Increase $(+)$ or Decrease $(-)$ .		
Quantity of	1904.	1903.	Amount.	Per Cent.	
Coal raised	Tons. 232,428,000	Tons. 230,334,000	Tons. (+) 2,094,000	(+) 0.9

by steamers engaged in the foreign trade	17,191,000	16,799,000	(+) 392,000	(+) 2.3	

#### Train Mileage.

No figures with regard to the average load of passenger or goods trains have, so far as is known, been compiled systematically by the majority of the railway companies; the following figures, however, showing the number of miles travelled by passenger and goods trains during 1903 and 1904 are, when taken together with the figures already quoted with regard to weight of goods carried and receipts therefrom, indicative of an increase in the average load of goods trains:—

Year.				Passenger Trains.	Goods Trains.	Total (including Mixed Trains.)			
1904 1903	:			(e) (e)	:	-	Million Miles. 240·0 232·4	Million Miles. 155·2 159·7	Million Miles. 397·0 394·0
Incre De	ase (	+) or e (-	(Mi	leage r cent	-	:	(+) 7·6 (+) 3·3	(-) 4·5 (-) 2·8	(+) 3·0 (+) 0·8

The Table shows that the efforts made to reduce goods train mileage resulted in a decrease of 4,500,000 miles, which compares with a decrease of 10,000,000 miles in 1903. This result has been achieved in the face of the increased tonnage of goods carried, amounting to 6,000,000 tons. With regard to passenger train mileage, however, although the increase in the number of passengers is smaller than in 1903, the increase in train mileage is much larger than in that year.

The following statement gives a summary of the rates of increase in passenger journeys, tonnage conveyed, receipts, and train mileage:—

				Per Cent.

<sup>\*</sup> From information specially returned to the Board of Trade by the Railway Companies. † From information specially supplied to the Board of Trade by the Commissioners of Customs. ‡ Excluding coal shipped for their own use by steamers engaged in the foreign trade.

It will be seen, on referring to Summary Table No. 18, that the receipts from passenger and goods traffic per train mile amounted to 62.74d., or approximately the same as in 1903.

With regard to passenger traffic, the receipts per train mile fell from 49·21d. in 1903 to 48·09d. in 1094—that being the lowest average since the year 1898, when the receipts from passenger traffic worked out at 48·00d. per train mile. The receipts from goods traffic, on the other hand, increased from 82·55d. per train mile in 1903 to 85·42d. in 1904—the corresponding average in 1898 being 69·68d.

The following statement shows the average receipts per train mile, distinguishing goods and passenger trains, during each of the last six years:—

		I I	Receipts per Train Mile	<u>.</u>		
	Year.	From Passenger Traffic.	From Goods Traffic.	From Passenger and Goods Traffic.		
		d.	d.	d.		
	1899	48:36	70.29	58.06	*	
	1900	49.08	71.06	59.01		
	1901	49.61	73.25	59-92		
	1902	49.50	77-08	61.27		
75	1903	49.21	82.55	62.79		
	1904	48.09	85.42	62.74		

## Working Expenditure.

In the year 1904, the total working expenditure increased in amount to the extent of 610,000l. This increase is rather less than that of the year 1903, and is relatively insignificant as compared with the very large increases in working expenditure which occurred in the years 1897-1900. The increased working expenditure was, moreover, accompanied by an increase in the gross receipts, and the proportion of working expenses to gross receipts remains at the same figure as in 1902 and 1903, viz: 62 per cent. The following Table shows the working expenses during each of the last ten years:—

	Year.			Total Working	Inere	ease.	Proportion Working Expenses	
							Expenses.	Åmount.
					Million £.	Million £.	, s = 10	Per Cent.
1895	-	. •	-		47.88	11	-	56
1896		-		-	50-19	2.31	4.8	56
1897			-	-	53.08	2.89	5.8	57
1898	* 1	-		-	55-96	2.88	5.4	58
1899		-	-	-	60-09	4.13	7.4	59
1900				-	64-74	4.65	7.7	62
1901			•	-	67.49	2.75	4.2	63
1902	-			-	67.84	0.35	0.5	62
1903				-	68.56	0.72	1.1	62
1904	-			-	69.17	0.61	0.9	62

23c

Attention was drawn in the Report for the year 1901 to the new system adopted in that year for calculating the receipts of railway companies from hotels owned by them. The gross receipts and the gross expenditure of all companies on account of hotels were first shown in that year, several companies having previously shewn only the net receipts. The effect of the alteration made was to swell both the gross receipts and the gross expenditure for 1901 as compared with previous years by about one million sterling. The net receipts were, however, not affected by the change, and the proportion of working expenses to gross receipts was also practically unaffected. The figures given for the years 1901 to 1904 are strictly comparative in all particulars.

The following is a comparison for 1903 and 1904 of the gross amounts of the expenses of the companies under the four principal heads. These heads cover the bulk of the expenses connected with the actual working of the lines, and they are also those chiefly influenced by variations in the charges for wages, fuel, and materials:—

1.1.

<u> </u>	ř		
Heads of Expenditure.	1904.	1903.	Increase (+) or Decrease (-)
10 0 mm mmm			^
	Million	Million	Million
	£.	£.	£.
Maintenance of way, works, and stations -	10.59	10-52	(+) 0.07
Locomotive power	- 18.50	18.53	(-) 0.03
Repair and renewal of carriages and waggons	5.64	5.59	(+) 0.05
Traffic expenses	20.47	20:35	(+) 0.12
			Eller Fix

The expenditure on "Maintenance of Way, &c.," increased by 70,000l. as against 320,000l. in 1903. That on "Repairs and Renewals of Carriages and Waggons" increased by 50,000l. in 1904 as compared with 80,000l. in 1903, whilst "Traffic Expenses" increased by 120,000l. as against 160,000l. in 1903. The expenditure for "Locomotive Power" (including repairs and renewals) which showed a falling off of 820,000l. in 1902 and 180,000l. in 1903, was further reduced by some 30,000l. in 1904. Taking the above four principal heads of expenditure together, the total increase under the heads of "Maintenance of Way, &c.," "Locomotive Power," "Repair and Renewal of Carriages and Waggons," and "Traffic Expenses" amounts to 210,000l., which compares with an increase under the same heads in 1903 of 380,000l. Of the remaining heads of expenditure, the increase in the miscellaneous expenditure, including Steam-boats, Docks, &c., amounted to 210,000l. The other principal item is the increase of 243,000l in Rates and Taxes. This increase continues a movement which has been in progress for several years, and has been commented upon in former

Reports. The amounts paid by the Railway Companies under this head year by year since 1895 were as follows:—

		Year	r.		i	Total Amount of Rates and Taxes.	Increase compared with previous year.
1895						£. 3,011,000	£
1896		-	-	-		3,149,000	138,000
1897		-	-	*	. 1	3,294,000	145,000
1898			-	٠	-	3,425,000	131,000
1899	*		-	-	-	3,582,000	157,000
1900	-	-	-			3,757,000	175,000
1901	90	-	*			3,980,000	223,000
1902		3	-	-		4,228,000	248,000
1903	-	-			-	4,493,000	265,000
1904	-		*	•	* i	4,736,000	243,000

There has thus been in the nine years a total increase of 1,725,000% in this item. As compared with the 1895 total, the sum paid by the Railway Companies under the head of Rates and Taxes in 1904 shows an advance of nearly 60 per cent.

As in previous years, an examination has been made of the accounts rendered to their shareholders by the principal companies, in order to arrive at the effect of variations in the cost of materials, and in the extent of the wages bill, on the increase in expenditure. The information which has been compiled from these accounts is given in Appendix C, and as the total working expenditure of the fifteen companies for which particulars are there given amounts to approximately 83 per cent. of the total working expenditure of all the companies during the year, it may be assumed that the expenditure of these fifteen principal companies is fairly representative of the whole. For these fifteen companies, the following figures show the cost of coal and materials used in the working and repair of engines:—

		Year				Expenditure on Coal and Coke.	Expenditure on Materials in Locomotive Repairing Department.	
1893						£. 3,199,000	£. 1,260,000	
1894	590	•		-	-	3,059,000	1,270,000	
1895	-	-				2,932,000	1,262,000	
1896	-			-		2,839,000	1,403,000	
1897					-	3,031,000	1,498,000	
1898						3,493,000	1,585,000	
1899	-	-		-		4,278,000	1,781,000	
1900	-			-	~	5,987,000	1,999,000	
1901		_	-		~	5,989,000	2,092,000	
1902	-	-		4	~	5,042,000	2,152,000	4 .
1903	-	-	-	-	-	4,959,000	2,211,000	
1904	-			-	-	4,837,000	2,146,000	

The figures relating to the cost of materials used in the maintenance of permanent way and in the repair and renewal of carriages and waggons, though given in the Appendix, are not quoted here, as undoubtedly much variation exists in the amounts of expenditure which individual companies may find it requisite to incur for these purposes in particular years. It will be seen, however, from the figures above quoted, that there was a continuous reduction in the expenditure on fuel in the four years from 1893 down to 1896, although there was, during the same period, a general increase in train mileage.

From 1896 to 1901 the expenditure on coal and coke increased yearly, the expenditure in 1901 being more than double that of 1896.

In 1902 this item of expenditure fell to 5,042,000*l.*, a decline of 947,000*l.*, or nearly 16 per cent., as compared with the previous year, and this was followed by a further decline of 83,000*l.* in 1903 and 122,000*l.* in 1904.

As some indication of the course of prices in recent years, and of the general fall in price that has taken place since 1901, the following statement with regard to coal, and iron and steel rails, will be of interest. It is, of course, to be understood that the figures quoted in the case of coal relate to all descriptions of coal, and not alone to those kinds which are used particularly for railway locomotive purposes:—

		Approximate Price of Coal at the Mines,	Average Export Pri Quantities and Declar	ces, computed from the ed Values of the Exports.	
	Year.	according to the "Mineral Statistics."	Of Coal.	Of Iron and Steel Rails.	
	1895	Per Ton. 6s. 0½d.	Per Ton. 9·21s.	Per Ton. 3.831.	
	1896	5s. 101d.	8.73s.	4·46l.	
	1897	5s. 11d.	8.828.	4·61 <i>l</i> .	
	1898	6s. 4\frac{1}{4}d.	9.79s.	4·57 <i>l</i> .	
	1899	7s. 7d.	10.53s.	4·90l.	
370.0	1900	10s. 94d.	16·52s.	6·33l.	
	1901	9s. 4\frac{1}{4}d.	†13.73s.	5·86l.	
	1902	8s. 23d.	†12.19s.	5.441.	
	1903	7s. 8d.	†11:58s.	5·32l.	
	1904	$17s. 2\frac{1}{2}d.$	†11·02s.	4.841.	

<sup>†</sup> The export price of coal includes, from the 19th April, 1901, the Export Duty of 1s. per ton. ‡ From information specially supplied to the Board of Trade by the Home Office.

The foregoing Table shows that during the last four years there has been a considerable fall in general prices of both coal and iron, and that, allowance being made for the export duty on coal, the prices in 1904 were lower than those of any year since 1898.

It is of interest to compare the number of train miles run with the quantity of fuel consumed for locomotive purposes, and also with the cost of fuel to the companies. The following Table shows the annual percentage increases or decreases which have occurred in these figures year by year since 1898:—

						Increase (+) or Decrease (-) As compared with the previous year.					
		Year.				In Total Train-Mileago.  In quantity of fuel consumed for locomotive purposes (by all Railway Companies).*		In Cost of Fuel (to fifteen Principal Railway Companies).			
						Per Cent.	Per Cent.	Per Cent.			
1898				-	-	(+) 3.4	(+) 7.5	(+) 15.2			
1899				-	-	(+) 4.2	\(\frac{1}{2}\)\(\frac{7.0}{2}\)	+ 22.5			
1900				-	-	(+) 1.5	(+) 5.0	(+) 39.9			
1901	•		•	-	- 1	(-) 0.8	1 7 1.6	(+) 0.03			
1902		(#):	-	-		(+) 0.2	\(\frac{1}{2}\)\(\frac{1}{2}\)\(\frac{1}{8}\)	( <del>-</del> ) 15.8			
1903			(#)	- 1		(-) 1.5	(+) 0.6	(-) 1.6			
1904	14				-	(+) 0.8	1 7 0.4	(-) 2.5			

<sup>\*</sup> The figures with regard to quantity of fuel consumed in each of the years 1898-1903 are to be found on page 45 of "Coal Tables, 1903" (Parl. Paper No. 295 of Session 1904). The figure for 1904 has been specially supplied to the Board of Trade by the Railway Companies.

The figures from which these percentages are deduced are not stated in the Table, for the reason that those relating to the cost of fuel are derived from the expenditure of fifteen selected companies only, while the other percentages are based on the totals for *all* the companies.

A comparison of the first two columns in the above Table shows that over the whole period and in every year except 1901 and 1904 the percentage increase in the quantity of fuel consumed was greater than the percentage increase in train mileage, a fact which is no doubt explained by the tendency to increase train loads and the consequent employment of heavier and more powerful locomotives.

The third column of the statement, when taken in connection with the second, brings out very distinctly the burden imposed upon the companies by the high prices of coal that ruled during the years 1898-1901. During the years 1902-1904 the expenditure on coal decreased, though the total quantities of coal consumed for locomotive purposes continuously increased.

As regards the expenses incurred in the payment of wages, the following figures, which relate to the fifteen principal Railway Companies of the United Kingdom, are taken from the table in the Appendix above referred to:—

				In Locomotive	e Department.	In Traffic	
	Year.			Working of Engines.	Repairing and Renewing Engines.	Department.	
1895		5		£. 3,963,000	£. 1,659,000	£. 9,980,000	
1896		-		4,148,000	1,758,000	10,383,000	
1897		•	1.3	4,427,000	1,804,000	11,050,000	
1898	÷	•		4,687,000	1,878,000	11,686,000	
1899		•		5,047,000	1,988,000	12,320,000	
1900	7.*	-	•	5,282,000	2,058,000	12,802,000	
1901	٠	-		5,259,000	2,106,000	13,099,000	
1902	- 4	-	-	5,251,000	2,219,000	13,352,000	
1903		9	•	5,213,000	2,255,000	13,534,000	
1904	•	-		5,178,000	2,223,000	13,654,000	1.00

On the assumption that the expenses of the smaller companies on account of wages showed the same tendency to increase as those of the larger, the following comparative statement may be given:—

Work done in 1904 as compared with 1903 —			Pe	er Cent.	•
Increase in number of ordinary passengers co	nveyed	-	-	0.3	
Increase in tonnage of goods carried -		-	-	1.4	
Increase in total train mileage		•		0.8	
Cost for wages in 1904 compared with 1903—					
Decrease in locomotive department -		-	-	0.9	
Increase in traffic department	•	-	•	0.9	
Increase in the two departments taken togeth	ner -		-	0.3	

In the figures already given (see page xiii) which show the total expenditure of the companies, all branches of expenditure were included; for certain purposes, however, more especially for showing the expenditure per train mile and per mile of open railway, it is desirable to exclude the expenditure of railway

companies on steamboats, docks, harbours, and canals. In Summary Table No. 16 a total is therefore given which shows the expenditure of the companies exclusive of Steamboat, Dock, Harbour and Canal Expenditure. The expenditure per train mile and per mile of open railway under each head except steamboat, etc., is shown in Table No. 19. The results per train mile run for the years 1903 and 1904 are summarised in the following statement:—

and the second second second	Cost per Tra	in-mile.	Increase (+) or Decrease (-)
Expenditure on account of—	1904.	1903.	in 1904.
Maintenance of way Locomotive power Rolling stock Traffic expenses General charges Rates and taxes Government duty*	d. 6:40 11:18 3:41 12:37 1:59 2:86 0:22	d. 6·41 11·28 3·41 12·40 1·58 2·73 0·23	(-)0·01 (-)0·03 (-)0·03 (+)0·01 (+)0·01
Compensation:  To Employees  Personal injuries to passengers  Damage to goods  Legal and Parliamentary expenses  Miscellaneous	0·10 0·08 0·24 0·18 1·20	0·09 0·10 0·27 0·20 1·13	(+) 0·01 (-) 0·02 (-) 0·03 (-) 0·02 (+) 0·07
Total (exclusive of expenditure on steam- boats, docks, harbours and canals)	39.83	39.81	(+) 0.02

<sup>\*</sup> For Great Britain only. The railway passenger duty is not charged in Ireland.

The above statement shows that the total cost per train-mile remained practically stationary, and that there was but little variation under the several heads, the greatest changes being an increase of 0.13d. on Rates and Taxes, and a decrease of 0.10d. on Locomotive Power.

The usual calculation respecting the expenditure per train mile of some of the principal companies will be found in Table No. 21 (see page 1).

# Net Earnings and Dividends.

As regards the question of the actual net earnings of the companies in 1904, the total gross receipts (including 8 millions sterling received from steamboats, canals, hotels and other miscellaneous sources) amounted in the year 1904 to 111,833,000*l.*, and the total working expenditure to 69,173,000*l.* The net receipts therefore amounted to 42,660,000*l.*, as against 42,327,000*l.* in the previous year. The proportion of net earnings to capital was very slightly less than in 1903, viz:—3.36 per cent. as compared with 3.40 per cent. The amount of paid up capital increased during the year by about 23½ millions (2 per cent.), and the increase since 1900 has been 92 millions (8 per cent.) As already stated, the average rates of dividend paid on the different classes of capital were practically the same in 1904 as in 1903, with the exception of the average rate of interest on loans, which fell from 4.46 in 1903 to 4.11 in 1904.

The following statement compares the proportion of net earnings to capital in each year from 1901 to 1904, with quinquennial averages for the preceding 30 years:—

	Ye	ais.					Proportion of total net earnings to Capital.
							Per cent.
Average of	1871-75	-	-	-		_	4.56
"	1876-80		-		-	-	4.29
	1881-85	~			-		4.22
)) ))	1886-90				-	21	4.07
,,	1891-95	-	$\equiv$		-	-	3.80
,,	1896-1900	-	-		-		3.64
Year	1901	_			27		3.27
,,	1902	-	*		-		3.42
1	1903	-	¥ .		-	- 1	3.40
"	1904	2	-		4	-	3.36

The proportion, it will be observed, shows a general tendency to decline. This, however, undoubtedly arises in part from nominal additions to capital on the conversion of stocks, such nominal additions representing, as already stated, over 15 per cent. of the total capital of the companies.

The following statement shows the amounts of each description of capital classed according to the rates of dividend or interest paid in 1904:—

							Ordina	ary.	Preferen	itial.	Guarant	ceed.	Loans and D Stock	
Rate	es of	Divide	nd or	Int	eres	t.	Amount of Capital.	Per cent. of Total.						
Nil						_	£. 62,449,665	13.0	£. 22,857,485	6-9	£. 100,859	0.1	£. 629,582	0.2
	hove	1 per	cent.				26,015,546	5.4	509,490	0.2	_	_	1,254,555	0.4

The following Table, which shows the amounts of the ordinary capital grouped according to dividends paid in each of the last five years, enables the variations which have occurred during that period to be easily traced:—

						1		Amov	int.—Millio	n £			Perce	entage of T	otal.

As will have been gathered from the general results of the year's working already dealt with, the variations between 1903 and 1904 are very slight, and the proportions of capital in each group remain practically the same as before.

# Track Mileage and Length of Sidings.

In last year's Report reference was made (page xx) to a new Table containing particulars, collected for the first time, with regard to track mileage and length of sidings. The Returns obtained for 1903 were incomplete, and the figures given in the Table were partly estimated. For 1904, Returns have been received in respect of all the railways of the United Kingdom, but in some cases the companies were able to furnish an approximate Return only, pending the completion of the re-measurement of their lines. This re-measurement will, it is understood, be completed in all cases during the present year, so that exact information will be available for publication in the next Report. A summary of the 1904 Returns is given on page xxv (Table No. 4) from which it will be seen that the total length of the running track of the railways of the United Kingdom, at the end of 1904, was approximately 37,900 miles, and that the total length of sidings was approximately 13,700 miles.

#### Summary.

The principal facts brought out by a comparison of last year's Returns with those of 1903, are summarised below, in accordance with the usual practice:—

SUMMARY of the MILEAGE, CAPITAL, TRAFFIC RECEIPTS, WORKING EXPENSES, and NET EARNINGS of the RAILWAYS of the UNITED KINGDOM in 1903 and 1904 compared.

According to the control of the cont	1904.	1903.	Increase in	1904.	Decrease	in 1904.

Net earnings	42,660,000	42,327,000	333,000	0.8	_	_
Proportion of net earnings to capital Dividend paid on ordinary capital-	Per cent. 3.36 *3.25	Per cent. 3.40 *3.29	_		0·04 0·04	1·2 1·2

<sup>\*</sup> These percentages are calculated on amounts a little in excess of the true totals. See note to Summary Table No. 9.

The final result of the year's working is that there have been small increases in gross receipts, working expenses and net earnings, but that owing to the simultaneous increase in capital, the percentage borne by net earnings to total capital shows a slight decline.

I have, &c.,

H. LLEWELLYN SMITH.

Commercial, Labour and Statistical Departments, Board of Trade, August, 1905.

<sup>\*</sup> Not classified.

<sup>†</sup> Including workmen's weekly tickets.

For 1902 and subsequent years the equivalent number of holders of annual tickets is given. Prior to 1902 the returns were not wholly but only partially on this basis.

<sup>§</sup> Owing to the revision of the list of articles included under the head of Minerals, the tonnages of Minerals and General Merchandise for the years 1903 and 1904 are not comparable with those for previous years.

<sup>†</sup> As the receipts per train mile of the London and North Western Company, on page xlix, for the years 1894-1901 include the proportion derived from the Steamboat Traffic, the expenditure per train mile of the Company shown above for those years includes the proportion due to the working of the Steamboats. This expenditure per train mile varied from 9d. to 1 1d. in the eight years.

§ The figures for 1901 do not compare with those for previous years owing to a change made in the mode of treating receipts from, and expenditure on, hotels; the gross figures being now given in all cases.

‡ The London Charles and Dover and South Rastern Railway Companies' lines have been reached by a Lordon mit mittee as one undertaking since the year 1899.

# RAILWAY RETURNS .- 1904.

## No. 1.—CAPITAL, &c.

Return of the authorised Share and Loan Capital of the several Railway Companies in England and Wales, Scotland, and Ireland, and of their Paid-up Ordinary, Preferential, and Guaranteed Capital, and Debenture Stock or Funded Debt, on the 31st day of December 1904, specifying the rate per cent. of the Dividends for the year 1904 on each of the said Capitals; showing also the Loans outstanding on the 31st day of December 1904, classified according to the several rates per cent. of Interest; and the Capital subscribed to other undertakings, whether such undertakings are on lease to, or worked by, the subscribing Company, or are independent.

Note.—The figures in *italies*, as regards the year 1904, on pages 2 to 45 show the amounts by which the Capitals of the Railway Companies have been nominally increased by the conversion, consolidation, and division of their Stocks. In certain cases the consolidation has resulted in a nominal decrease, the amounts by which the Capitals were so decreased being specially noted. The amounts of Capital printed in Roman type include the nominal additions and show the sums receiving the rates of dividend stated against them.

a The line is the property of the Plymouth, Devonport, and South-Western Junction Railway Company, and is worked by that Company.

b Including 340 miles run by rail motor car.

c A short line, 1 mile 61 chains in length, belonging to the London and India Docks Company, runs from the North Woolwich Branch of the Great Eastern Railway to Gallions. Passengers and parcels, which constitute the trafic on this line, are carried in the trains of the Great Eastern Railway Company. The total receipts of the Docks Company from the railway in the year 1904 were £0,431, and the expenditure, so far as it can be separated from the Dock expenditure, was £7,100.

c Amalgamated with Great Western as from the 1st July, 1904.

# APPENDIX E. NEW COMPANIES—1904

NEW RAILWAY COMPANIES INCORPORATED UNDER ACTS OF PARLIAMENT IN THE YEAR.

NIL IN 1904.

NEW RAILWAY COMPANIES INCORPORATED BY ORDERS UNDER THE LIGHT RAILWAYS ACT 1896, AND SUBJECT TO THE PROVISIONS OF SECTIONS 9 AND 10 OF THE REGULATION OF RAILWAYS ACT, 1871.

Southend and Colchester.\*

Witney, Burford and Andoversford.

Woodbridge and Bawdsey.

<sup>\*</sup> Sections 9 and 10 of the Regulation of Railways Act, 1871, do not at present apply to this Company. The Southend and Colchester Line is, however, of the character of a Railway, and the Board of Trade have power to require Returns from the Company.

#### APPENDIX F.
